Judy Orrill Kimmel is a tireless researcher who is the leading authority on the Orrill line. She is the Director of the Orrill Family Genealogy Database. Judy was made an Honorary Charter Member in 2001.

From The Authors

The purpose and goal of the Orrell Family Association can best be told from the first page of our website:

The purpose and goal of the Orrell Family Association website is to document and share genealogical data on the Orrell surname from around the world and all periods of time. This includes various spellings of the surname: Orrell, Orrel, Orell, Orrill, Orril, Orill, Orrells, Orrills, Orel, Oril, Orrall, etc. It is our belief that a true genealogist never completely finishes his research. Within any family line there are continual births, deaths, and marriages. We will never stop researching the Orrell family and its allied lines. One's family tree is not composed of only direct line ancestors. All of your progenitor's descendants are your aunts, uncles, cousins or their spouses. They are all important. New researchers, or even curious onlookers, often have additional information and documents that have eluded even the most seasoned genealogist. It is our hope that such individuals visiting our website will share their findings with us. The Charter Members of the Orrell Family Association believe that all of our genealogy data, documents, and photos do absolutely no good to anyone else when they are stored on our computers or locked up within our file cabinets. We do not view these items the way a pirate might view a treasure map. We believe in sharing our genealogy treasures with others. It is our hope that everyone researching the Orrell surname feels the same way and will graciously share their information with us.

In 1994, Robert Stanley Orrell published “The Orrel Family in the U.S. Census”, on which the following book was based. Bob’s book published every census record available at that time. Since then many more census indexes have been published and added to this collection. Many of the records found in this book were made available through Ancestry.com’s wonder collection of census images and indexes.

Brief Discussion of the U. S. Census

A nationwide population census on a regular basis dates from the establishment of the United States, Article I, Section 2, of the United State Constitution required in 1787 that -

Representative and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three-fifths of all other Persons. The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United States, and within every subsequent Term of ten Years, in such Manner as they shall by Law direct.

In subsequent decades, the practice of “Service for a Term of Years” died out. “Indians not Taxed” where those not living in settled areas and paying taxes; by the 1940's American Indians were considered to be taxed. The Civil War of 1861-1865 ended slavery (abolished legally through the 14th Amendment of the Constitution, ratified in 1868), officially ended Article I's three-fifths rule. Thus, the original census requirements were modified. Direct taxation based on the census never became practical.

The first enumeration began on the first Monday in August in 1790, little more than a year after the inauguration of President Washington and shortly before the second session of the first Congress ended.

Confidentiality, Schedules and questionnaires from the censuses of population and housing are confidential, by law, for 72 years. During this period, they cannot be released to anyone except the named individuals, their heirs (on proof of death), or their legal representatives.

1790 Census

The 1790 census included: Connecticut, Delaware, Georgia, Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Northwest Territory, Pennsylvania, Rhode Island, South Carolina, Southwest Territory, Vermont, and Virginia. 1790 census losses includes those for Kentucky, Delaware, Georgia, New Jersey, and Virginia as well of counties in states.

The six inquired in 1790 called for the name of the head of the family and the number of persons in each household of the following description: Free White males of 16 years and upward, free White males under 16 years, free White females, all other free persons (by sex and color) and slaves.

1800 Census

The 1800 census included two new states admitted to the Union since 1790: Kentucky, admitted in 1792; and Tennessee (previously the Southwest Territory), admitted in 1796 for a total of 16 states in the Union. In addition, three territories were enumerated for the first time in 1800: Mississippi Territory (created in 1798); the Northwest Territory (created in 1787 - but not enumerated in 1790); and Indiana Territory. Maine was still a federal court district within the

state of Massachusetts; and therefore, had a separate census taken.

1800 Census Losses: District wide census losses included those for Georgia, Indiana territory, Kentucky, Mississippi Territory, New Jersey, Northwest Territory, and Tennessee.

The 1800 and 1810 population census were similar in scope and method to the 1790 census.

1810 Census

The 1810 census included the new state of Ohio (admitted in 1803), bringing the total to 17 states. The 1810 census also included the District of Columbia, which had been separated from Virginia and Maryland for the first time.

1810 Census Losses: District wide census losses include those for the District of Columbia, Georgia, Indiana Territory, Michigan Territory, Mississippi Territory, Louisiana Territory, New Jersey, and Tennessee.

1820 Census

By 1820, six new states had been formed bring the total to 23 states in the Union. The six were: Louisiana (1812); Indiana (1816); Mississippi (1817); Illinois (1818); Alabama (1819); and Maine (1820).

1820 Census Losses: District wide census losses included those for Arkansas Territory, Missouri Territory, and New Jersey.

The 1820 census format included the name of a head of household, the number of free white males and free white females in specific age categories, the name of a slave owner, the number of slaves owned by that person, the number of male and female slaves by age categories, and the number of foreigners (not naturalized) in a household.

1830 Census

Missouri became a state in 1821, bringing the total number of states in the 1830 census to 24. Florida was purchased from Spain in 1819, but treaty ratification did not occur until 1821.

1830 Census Losses: None for 1830 except some countywide losses in Massachusetts, Maryland, and Mississippi.

The 1830 census format included the name of a head of household; the number of free white males and free white females in specific age categories; the name of a slave owner and number of slaves owned by that person; the number of male and female slaves by age categories; the number of foreigners (not naturalized) in a household; and the number of deaf, dumb, and blind persons within a household.

1840 Census

Two new states were included in the 1840 census: Arkansas (1836); and Michigan (1837), bringing the total number of states to 26. Florida Territory was enumerated as were 2 new territories: Wisconsin Territory and Iowa Territory.

1840 Census Losses: There were no substantial census losses for the 1840 census or for following census years, excluding 1890.

The 1840 census format included the name of a head of household; the number of free white males and free white females in specific age categories; the name of a slave owner and number of slaves owned by that person; the number of male and female slaves by age categories; the number of foreigners (not naturalized) in a household; the number of deaf, dumb, and blind persons within a house; the number and age of each person receiving a military pension, ; and the number of persons attending school.

1850 Census

Between 1840 and 1850, five new states were added to the Union: Florida (1845); Texas (1845); Iowa (1846); Wisconsin (1848); and California (1850), bringing the total number of states to 31.

For the first time, the 1850 Census schedules listed the names of every person in a household. The categories included the following for each person: name; age as of the census day (1 June 1850); sex; color; birthplace; occupation; value of real estate; whether married within the previous year; whether deaf, dumb, blind or insane; whether a pauper; whether able to read or speak English; and whether the person attended school within the previous year. No relationships were shown between members of a household.

1860 Census

Between 1850 & 1860, two new states were added to the Union for a total of 33 states: Minnesota (1858) and Oregon (1859).

The 1860 census schedules listed the name of every person in a household with a census day of 1 June 1860. The categories included the following for each person: name; age as of the census day; sex; color; birthplace; occupation; value of real estate; value of personal estate; whether married within the previous year; whether deaf, dumb, blind, or insane; whether a pauper; whether able to read or speak English; and whether the person attended school within the previous year. No relationship between members of a household were given.

1870 Census

Between 1860 and 1870 - the decade of the Civil War - four new states were added to the Union for a total of 37 states: Kansas (1863); West Virginia (1863); Nevada (1864); and Nebraska (1867). Six new territories were created: Dakota and Colorado Territories in 1861; Arizona and Idaho Territories in 1863, Montana Territory in 1864, and Wyoming Territory in 1868.

The 1870 census schedules listed the name of every person in a household with a census day of 1 June 1870. The categories included the following for each person: name; age as of the census day; month of birth if born during the year; sex; color; birthplace; occupation; value of real estate; value of personal estate; whether married within the previous year; month of marriage if married within the previous year; whether deaf, dumb, blind, or insane; whether able to read or write; whether father or mother of foreign birth; and whether the person attended school within the previous year. No relationships between members of a household were shown.

1880 Census

Colorado became a state in 1876, bringing the total to thirty-eight states.

The 1880 census schedules listed the name of every person in a household with a census day of 1 June 1880. The categories included the following for each person: name; age as of the census day; month of birth if born during the year; relationship to the head of house; name of street and number of house; sex; color; birthplace; occupation; marital status; whether married within the previous year; whether temporarily or permanently disabled; whether crippled, maimed, or deformed; time unemployed during the census year; whether deaf, dumb, blind, or insane; whether able to read or write; birthplace of father and mother; and whether the person attended school within the previous year.

1890 Census

1890: Six new states were added to the Union between 1880 and 1890: Montana, North Dakota, south Dakota, and Washington, all in 1889; plus Idaho and Wyoming in 1890, bringing the total to forty-four states. Sadly, over 99 percent of the 1890 population schedules were destroyed in a fire which took place in January 1921 at the Commerce Building in Washington, D.C. Of the 62,979,766 persons enumerated in 1890, a total of 6,160 names could be extracted from the surviving schedules. In addition to the regular 1890 population census, a special census listing was extracted from the population schedules for surviving Union soldiers, sailors, and marines, (or their widows). Of the forty nine states and territories enumerated in 1890, sixteen of the states "Union Veterans' Schedules were apparently lost in the fire.

Unlike any earlier census, the 1890 format was one sheet for one household. The detailed information captured for every household was extensive, including the address of the house; the number of persons in the household; each individual by name; whether a soldier, sailor, or marine during the Civil War and whether Union or Confederate, or whether the widow of a veteran; relationship to the head of house; race; sex; age; marital status; whether married during the previous year; if a mother, mother of how many children living; place of birth of the individual and his/her father and mother; if foreign born, how many years in the U.S.; whether naturalized or in the process of naturalization; a profession, trade, or occupation; the number of months unemployed during the previous year; ability to read and write; ability to speak English, if not, language or dialect spoken; whether suffering from an acute or chronic disease, if so, name of disease and length of time afflicted; whether defective in mind, sight, hearing, or speech, or whether crippled, maimed, or deformed, with the name of defect; whether a prisoner, convict, homeless child, or pauper; whether the home was rented or owned by the head or other member of the family, and whether it was mortgaged; whether a farmer, and if so, whether the farm was rented or owned; and if mortgaged, the post office address of the owner.

1900 Census

Utah was added in 1896, bringing the total to 45 states.

The 1900-1920 census schedules listed the name of every person in a household and included the name and age of each person; relationship to the head of house; name of street and number of house; sex; color; birthplace; occupation; marital state; number of years in the U.S.; birthplace of father and mother; whether parents were of foreign birth; whether able to read or write, or

speak English, or attended school within the previous year. One question unique to the 1900 census was the month of birth for a person; while the 1900 and 1910 censuses added questions for number of years in a marriage, number of children born to a mother, and number of children still living at the time of the census.

1910 Census

Oklahoma was added in 1907, bringing the total to 46 states. (For discussion of content of the 1910 census please see discussion of the 1900 census.)

1920 Census

Arizona and New Mexico were added in 1912, bring the total to 48 states. (For a discussion of content of the 1920 census please see discussion of the 1900 census).

Later Census Years

Hawaii was annexed to the U.S. in 1898; became a territory in 1900, and a state in 1959; while Alaska became a territory in 1912 and a state in 1959. From 1920 through the 1950 census there were 48 states. The 1960 census is the first census with all 50 states.

The 1930 Census was released in April, 2002; however due to the length of time it will take to collect records and images, the 1930 Census will be a forthcoming book on the Orrell - Orrill Family.

First Name Alphabetical Index

Every image within this book may also be found on the accompanying CD-ROM and also within The Orrell Family Association website (<http://www.orrellfamily.com>).

In those instances where the actual census image has been located and reproduced within the book, you will find those individuals and families listed within a chart form. The explanation to that chart is as follows: (See sample below:)

3324	Orrell, Mary Eliza	Census - 1870 - N. Carolina	1870	NC	4975	New Hanover, age 19
----------------------	--------------------	-----------------------------	------	----	------	---------------------

The columns indicate the following:

Column #1 - Image number (described below)

Column #2 - Person's name. Remember that many of the images are listed according to the way the name was spelled in the actual record. Therefore check for alternate spellings of the name. Also be advised that females might be listed under their maiden or married names.

Column #3 - Type of Record

Column #4 - Year of Record

Column #5 - Place of Record

Column #6 - RIN number. Bob Orrell maintains the master Orrell - Orrill genealogy database. Each person in the database is assigned a Random Identification Number (RIN) by the genealogy software program. This helps us in locating the person and connecting families.

Column #7 - Notes Field. Most records contain some sort of note. Some of this might be cryptic at first; however you should be able to figure it out. The phrase 'd of', 's of', 'sp of' mean 'daughter of', 'son of', and 'spouse of'. In census records the phrase 'HH' means 'Head of Household' and 'ED' means 'Enumeration District'. At the beginning of census records you will generally see the county in which the record was found. At the end of many of the census listings you find 'w *followed by a name*' Therefore 'w Robert John' would mean 'with Robert John Orrell (or another spelling)'.

NOTE FOR COLUMN 1: The left column on the index contains the image number. That image number corresponds to the image on the CD-ROM. The image number also corresponds to the location of the image on the Orrell Family Association Website. For example, image # 1234 is located on the CD-ROM as 1234.jpg. Using Windows Explorer merely find that image number on the CD-ROM and double click the name. The image will open in your default image viewer program.

The image number tells where the image is located on the website. Image #1234 is located at <http://www.orrellfamily.com/paf/scanned/1234.jpg>. You can view this image on the website by opening your Internet web browser and typing the following in the web address line:

<http://www.orrellfamily.com/paf/scanned/1234.jpg>

Merely substitute the number above (i.e. 1234) with the number of the image you are interested in to find other images.

You will often find many persons linked to the same image number. With the scanned census images we have listed every household member who ties in to the Orrell - Orrill line. Therefore a census image containing a husband, wife, and five children would actually show up seven times in the index. While we actually have 1,091 census images, the following index contains 3,587 listings.

“First Name Alphabetical Index”

Below is a listing of persons found within the census images in this book and the accompanying CD-ROM. While similar to the family charts found throughout this book, it has been slightly changed to print properly. Due to the way this listing was prepared, genealogy researchers should find it to be very helpful.

This list is alphabetically sorted by FIRST NAME, then SURNAME, for several reasons. It must be remembered that in years gone by, people were not as educated as they are today. Many could not read, write, or spell. Additionally, many persons were new to the country, coming from a different language. While most Orrells & Orrills are of English descent; not all are. The Census Takers were probably better educated than most citizens; however, they were still prone to errors. They recorded names as best they could. This is why we see so many variations of the surname.

By sorting alphabetically by First Name you will be able to find (i.e.) John Orrell, regardless of how his last name is spelled in the census.

Column 1: Image number of the graphic on which the listing is found.

Column 2: Name sorted by first name.

Column 3: Year of Census Record.

Column 4: State.

Column 5: Notes. In most cases the county, person's age, and head of household (listed as HH in column 5) is recorded.

There are 1,091 census images within this book. This list contains 3,587 entries due to the fact that every person enumerated within the household has been given a separate entry.

A regular alphabetical index is located at the back of the book.

## Index

**NOTE:** This index does not include the "First Name" Alphabetical Index which started on page 5 and ran through page 122. This is a regular type index found in all books. For your convenience, the index shows the census year in which the entry is found followed by the page number on which the entry is located. Thus, in the first entry below, the listing for James Abbot is located with census year 1860 and found on page 242 of this book. Be careful to look closely on the page indicated. In some instances there may be two or more persons listed on a page with the same name. There are formatting issues with a book this size; therefore page numbers might be slightly off.
